## Experienced Healthcare Business Analyst

### Description

Wellnecity is the platform for high performing health plans. We help self-insured employers, advisors, and vendors achieve cost savings, better benefit utilization, and improved member outcomes. If you are passionate about data and improving the US healthcare system, help us rewrite the rules leveraging our proprietary Smart Hub. The ideal candidate will thrive in a fast-paced entrepreneurial environment where your voice is expected to be heard. This is someone who enjoys structuring problems that can be solved through data and analytic methods. Wellnecity offers unparalleled opportunities for personal development and career acceleration.

### Responsibilities

- Use statistical methods to analyze data and generate useful business insights
- Create models to identify trends and track changes across time
- Develop and deliver analyses and reports to internal and external stakeholders
- Work with customer success team leads to identify savings opportunity areas for external stakeholders
- Track the performance of Health Plan initiatives for external stakeholders and proactively identify ways to improve performance
- Combine quantitative data with qualitative data (e.g., Health Plan contracts) to help internal and external stakeholders understand the relationship between claims data and broader Health Plan decisions
- Work with management team to structure an analytic environment that supports ongoing problem-solving
- Support R&D to help better understand people and their healthcare usage patterns and identify strategies to decrease cost and improve health outcomes
- Communicate directly with client stakeholders to assist in managing client and vendor expectations while delivering high quality customer service

### Qualifications

- 1-2 years of experience working in a role as a data analyst
- Bachelor's degree required, Master's preferred with practical and academic experience in data analytics or healthcare
- Demonstrated success in team environments
- Detailed analytical abilities demonstrated through coursework and job experience
- A natural curiosity for identifying issues within data and developing business solutions
- Data Visualization skills a plus (e.g., Looker)
- Experience in the healthcare industry required
- Experience in financial modeling a plus, but not required
- Experience in Google Cloud Platform a plus, but not required
- SQL experience required; R and Python a plus
- Ability to work in a fast-paced environment

### Hiring organization

Wellnecity

### Job Location

436 E 36th St, 28205, Charlotte, North Carolina

### Date posted

October 2, 2023

- Ability to excel in ambiguous environments

Wellnecity is a venture capital-backed innovator reshaping healthcare in the US. We are on a mission to use technology to help self-insured employers manage the rising costs of healthcare benefits while improving outcomes for their employees. This is accomplished by using data analytics to create a simple way for employers to manage their health plans like a Fortune 100 company. Come join a fast-growing startup where you will gain experience from seasoned leaders, exposure to a diverse and exciting set of technologies and clients, and an opportunity to create a real impact on Wellnecity's future. We offer competitive salary, equity, 401K, and benefits.

Wellnecity is an Equal Opportunity Employer, and all qualified applicants will receive consideration for employment without regard to race, color, age, religion, sex (including pregnancy and gender identity), national origin, sexual orientation, disability status, protected veteran status, or any other characteristic protected by law.
