## Data Analyst

### Description

Wellnecity provides innovative data insights & services through its Proactive Health Plan Management™ platform to reshape health care performance for self-insured employers and their employees. We are hiring a data analyst with an interest in data and healthcare background to join our firm headquartered in Winston-Salem, NC. The ideal candidate will have a data-focused background with exposure to modern database management techniques and technologies, ETL, and data modeling, and object-oriented programming. The right candidate will be excited by the prospect of optimizing data & technology architecture to support Wellnecity's next generation of products.

### Responsibilities

- Designing and developing scalable modern data systems running on fully cloud infrastructure
- Operate a data hub, delivering clinical, financial, and utilization information to partners and internal business stakeholders on a regular and on-demand basis
- 
- Prepare healthcare data for ingestion and conversion to a unified data standard using ETL and automation tools
- Maintain Wellnecity's analytic environment (Looker, Postgres, Knime) by creating queries, dashboards, and data pipelines
- Own data integrity, availability, documentation, and efficient access to data and analyses
- Identify opportunities for process improvement in the end-to-end data development and delivery lifecycle
- Incorporate automation wherever possible to improve access to data and analyses
- Establish and troubleshoot data connections with Wellnecity's data providers and performance partner networks

### Qualifications

- Demonstrated success in team environments
- Detailed analytical abilities demonstrated either through coursework or job experience
- A natural curiosity for identifying issues within data and developing business solutions
- Data Visualization skills a plus (Looker Preferred; Tableau or
- Experience or demonstrated interest in the healthcare industry a plus, but not required
- SQL experience required
- Programming Experience is a plus – Python and JavaScript

### Hiring organization

Wellnecity

### Job Location

500 W. 5th St, 27101, Winston-Salem, North Carolina

### Date posted

September 19, 2022

- Experience working with modern ETL tools such as Snaplogic or Airflow
- Experience working with semi-structured JSON data is a plus
- Bachelor's degree required, Master's preferred with practical or academic experience in computer science, data engineering, or business analytics is a plus
