Data Analyst

Description

Wellnecity provides innovative data insights & services through its ProActive Health Plan Management™ platform to reshape the health care experience for self-insured employers and their employees. We are hiring a Data Analyst to join our Winston-Salem, NC office. This position reports to the Design Lab and Data Solution Leader and is responsible for the development and implementation of data exports, reports, and ETL set up. The ideal candidate for this role is a team player and proactive in creating solutions that deliver scalable results utilizing big data, analysis, and insights. This role requires an organized, high energy, and accountable individual with high attention to detail and the desire to exceed expectations.

We are looking for strong business analysts to complement and support a client service team

Responsibilities

- Support business teams in identifying and implementing health plan savings strategies to improve both quality of care and cost of care
- Prepare healthcare data for ingestion and conversion to a unified data standard using ETL and automation tools
- Maintain Wellnecity's analytic environment (Looker, Postgres, Knime) by creating queries, dashboards, and data pipelines
- Operate a data hub, delivering clinical, financial, and utilization information to partners on a regular and on-demand basis
- Own data integrity, availability, documentation, and efficient access to data and analyses.
- Identify opportunities for process improvement in the end-to-end data development and delivery lifecycle
- Incorporate automation wherever possible to improve access to data and analyses.

Qualifications

- Bachelor's degree required, Master's preferred with practical or academic experience in computer science, data engineering, or business analytics
- Demonstrated success in team environments
- Strong written and verbal communication skills
- Detailed analytical abilities demonstrated either through coursework or job experience
- A natural curiosity for identifying issues within data and developing business solutions
- Data Visualization skills a plus (e.g., Tableau or PowerBI)
- Experience in the healthcare industry a plus, but not required
- SQL experience required; R, Python, and Java a plus
- Ability to work in a fast-paced environment

Wellnecity is an Equal Opportunity Employer, and all qualified applicants will receive consideration for employment without regard to race, color, age, religion,
